Training & Certifications

Managing training and certifications manually is an error-prone process. Doing it manually creates added risk to your business.

- Upload documents to prove your team has correct training and certifications.
- Expiry reminders so you'll never let expired training or certifications slip through.
- Keep it all in the once place.

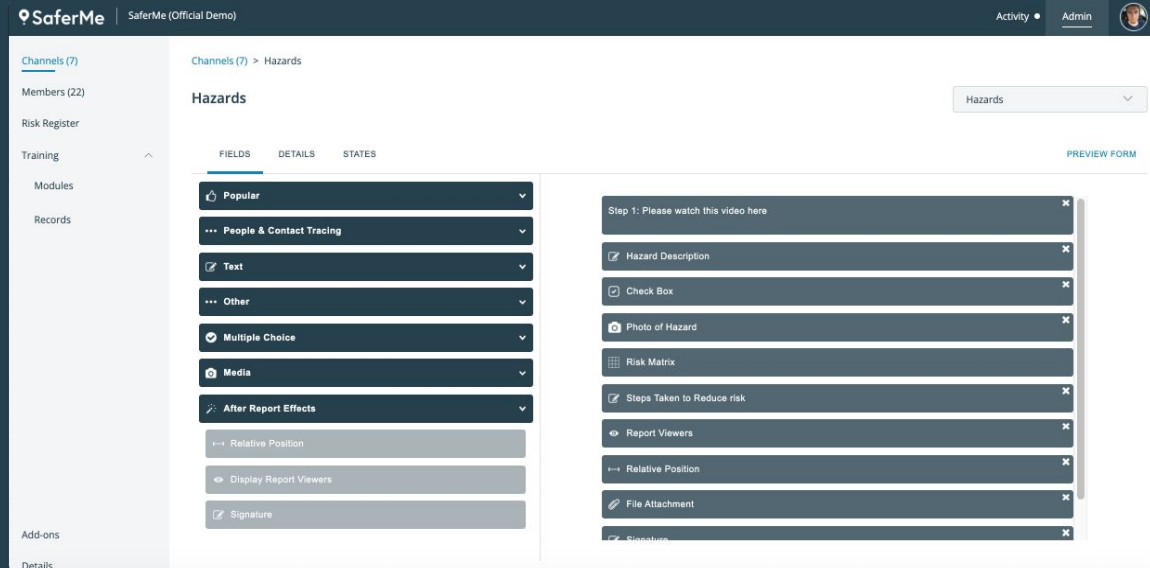

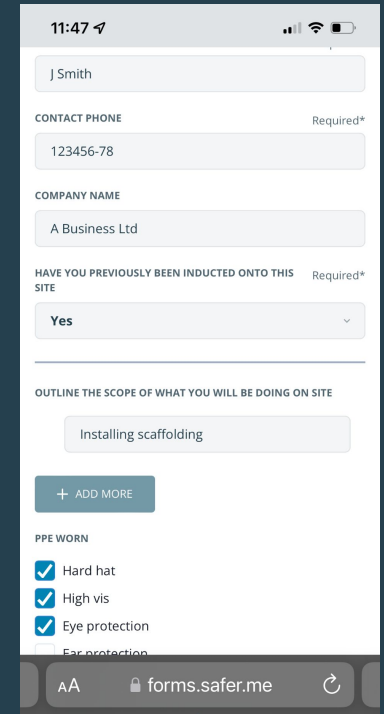

The screenshot displays the SaferMe interface for managing training and competency records. The top navigation bar includes the SaferMe logo, the user name 'FB Electric', and links for 'Activity' and 'Admin'. A sidebar on the left contains navigation options: 'Channels (5)', 'Members (13)', 'Risk Register', 'Training', 'Modules', and 'Records'. The main content area is titled 'Training and Competency - Records' and features four summary cards: 'Expired' (2), 'Expiring in 1 week' (0), 'Expiring in 1 month' (4), and 'Expiring in 3 months' (12). Below these cards are filters for 'NAME OF RECORD', 'CATEGORY', 'MEMBER', and 'REVIEW / EXPIRY DATE', all set to 'Any'. A 'DOWNLOAD' button and an 'ADD RECORD' button are also present. The main table lists records with the following columns: MODULE, CATEGORY, COMPETENCY LEVEL, MEMBER, REVIEW/EXPIRY DATE, and ATTACHMENT. The table contains seven rows of data, including records for 'Driver's License 1R', 'Forklift License', 'Working at Heights', 'Land Leveller', and 'Water Blasting'.

MODULE	CATEGORY	COMPETENCY LEVEL	MEMBER	REVIEW/EXPIRY DATE	ATTACHMENT
Driver's License 1R	Certificate / Qualification		Adam Kennel	28/05/2021	Attachment.PDF
Forklift License	Certificate / Qualification		Chris Smith	10/05/2021	Attachment.PDF
Working at Heights	Competency	2 - Trained but needs su...	Karl Winkles	03/07/2021	
Working at Heights	Competency	2 - Trained but needs su...	Sarah Short	03/09/2021	
Land Leveller	Competency	1 - Requires training	Chris Smith	03/09/2021	
Land Leveller	Competency	3 - Competent	Adam Kennel	03/09/2021	
Water Blasting	Competency		Chris Smith	25/11/2022	

Flexible Safety Form Builder

Create tailored report forms that are modern & simple to use, and accessible anywhere via **iOS, Android or web browser**.

All SME safety needs covered

Vehicle Inspections

Vehicle Pre-start Inspections from your mobile

Simple to use, fast to complete

Immediate manager access to report data

Use QR codes in vehicles to make process even easier

Site Inductions

Workers can sign off on safety information on their mobile

Easily keep a digital record of inductions

Use QR codes to make the process even easier

Toolbox Talks

Record notes for your toolbox talks and document them

Share with all attendees

Have workers sign to confirm attendance

SaferMe offers toolbox talk suggestion packs

QR Code Access

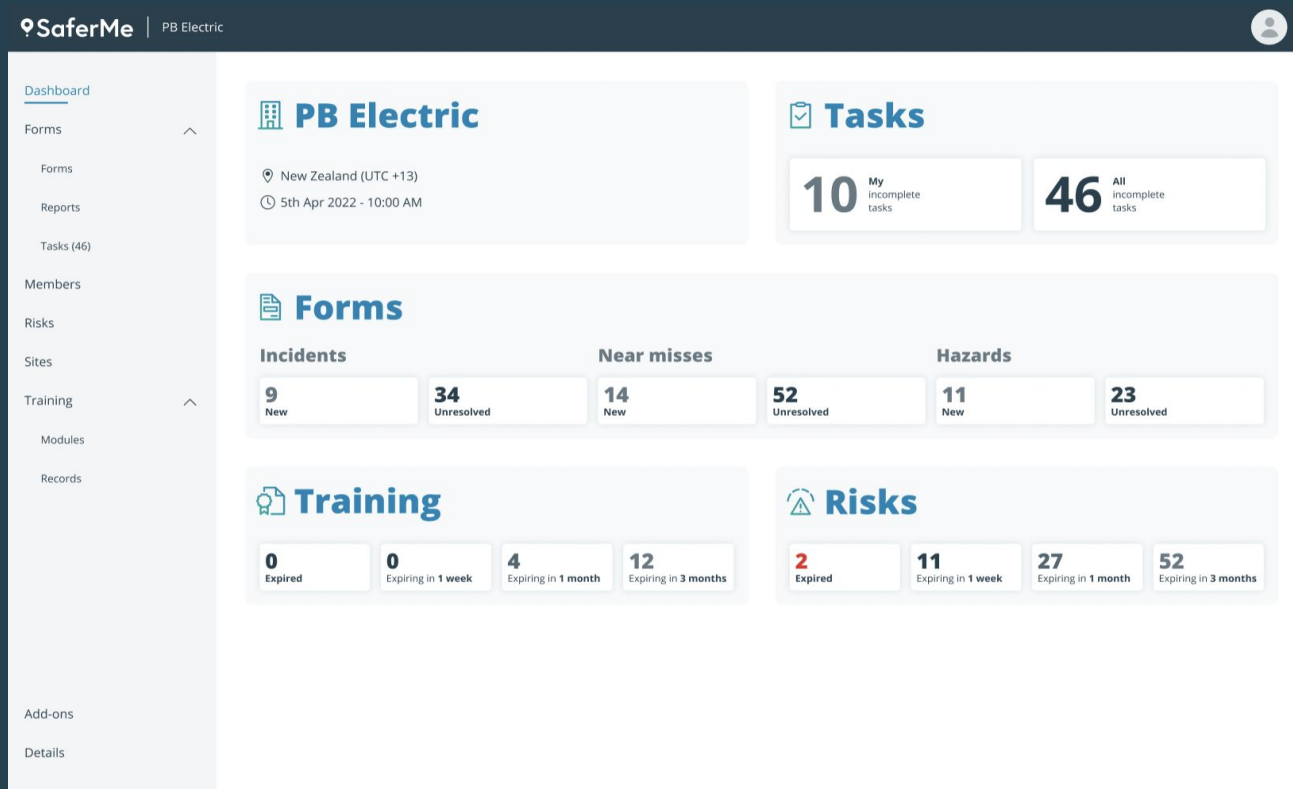

Combining a flexible form builder with QR Code (web) access to forms gives flexibility to your business. Any form can be created. Try an example QR Code induction form below:
