

# Top school matures checks, hazards & risk management with SaferMe

## THE CHALLENGE

Cashmere Primary - Te Pae Kererū is one of Christchurch's most respected primary schools. The school Board wanted to modernise its risk management process, while the Principal and caretaker wanted to improve communication & follow-up around playground checks, and the reporting & resolving of hazards.

## ACTION

The school Board digitised its risk register using SaferMe and rolled out the SaferMe app to a handful of staff to enable easy reporting & alerts. SaferMe's QR codes were deployed to enable easy community reports of hazard / maintenance issues.

## RESULTS

SaferMe offers automated reminders to review the risk register which has enabled the Board to implement a more thorough and consistent risk management process.

Additionally, the hazard reports & playground checks give Principal Gavin Burn transparency right through the process of resolving issues.

"Our risk management process is so much easier and clearer than before.

"The app is very easy to use and for me it's a real comfort to know about hazards straight away. Being able to track these issues in the app to make sure they are resolved in a timely and appropriate manner gives me greater peace of mind."

What the school says ...

**"It's a real comfort to know about hazards straight away.**

**"Being able to track these issues in the app gives me greater peace of mind."**

Gavin Burn  
Principal  
Cashmere Primary
